

SPEECH THERAPY TOOL

Lively
Colours

Elegant
Ergonomic
Shapes

This tool is a development of speech therapy to a completely different level.

Smart Mouth can clearly show and test the positions of the tongue, which have not yet been possible to demonstrate in other ways.

The movable model of the oral cavity works well even when coordinating movements of the dominant hand and the tongue and thus improves the cooperation of both cerebral hemispheres.

SMART MOUTH

Principaux avantages SMART MOUTH

Augmenter la motivation

Démonstration et
approche
multisensorielle

Connaissance du travail
des parleurs

Coopération des
hémisphères cérébraux
